CAPABILITIES

CAPABILITIES

Schaeffer Industries is a high reputable producer of (i) structural **steel pipe and tube** in round, square and rectangle shapes, and (ii) custom **rollformed profiles** from structural grade steel sheet coil. All tubular products are produced domestically to ASTM A500 Grade B. Most of our square and rectangle tubing also satisfies Grade C, and a high percentage of our round tubing also meets ASTM A53 Grade B (non-hydro).

Tube Sizes:

- Squares from 2” x .095” wall through 6” x .250” wall
- Rectangles from 3” x 2” x .095” wall through 8” x 4” x .250” wall
- Rounds from 2.375” OD x .154” wall through 6.625” OD x .280” wall

Custom Rollforming:

- Strip Size - 1”- 20”
- Material - Hot Rolled Steel, Pickled and Oiled Steel, Cold Rolled Steel and Galvanized Steel
- Thicknesses - .033 - .250

COMPETITIVE ADVANTAGE

Schaeffer Industries’ pipe and tube mill is the first of its kind in the United States. Fast, top-quality production rates are combined with quick roll-change technologies to provide the fastest and most efficient roll cycle in the industry. Thus, our complete size range is readily available and special lengths are immediately milled upon request. With multiple manufacturing and distribution facilities in the Western United States, Schaeffer Industries is well positioned to provide delivery of large tonnage projects quickly.
